

Flexi-Masterclass in Financial and Commodity Trading

Class Contents

- Fundamentals that impact the financial, commodity, and crypto markets
- Market terminology
- How all markets are correlated
- The various trading techniques used by pro traders
- How to manage risk and assess risk-reward
- How to analyse charts and use them to identify high-probability trading opportunities
- How to trade spot, futures, and options.

Each day is broken into two sessions. The morning session is theory, and the afternoon is the opportunity to put theory into practice, using a pro trading system and real-time data on various asset classes.

This masterclass delivers the knowledge and trading skills required to begin your trading career. Pass the final test and challenge and receive your certificate. This will also lead to an opportunity to have a funded account.

Begin your trading journey today.
